

## TECHNICAL DATA SHEET

**DESCRIPTION** TSA AIRCHECK® + N 4W - IRR 4 X WRAP VHP + NEUTS,  
DEEP FILL, 90MM PLATES

**SGL PRODUCT CODE** 5509

Tryptone Soya Agar (TSA), also known as casein soya bean digest agar, is a medium primarily designed to recover a wide range of micro-organisms as described in the European Pharmacopoeia (EP) 2.6.12 and United States Pharmacopeia (USP) <61>. The medium contains a variety of neutralising agents to reduce the growth inhibiting effects of a range of potentially interfering or antimicrobial substances. The 90mm diameter plates are quadruple wrapped and irradiated to ensure sterility and intended for use in cleanroom environments. The deeper fill volume allows for greater exposure times in high air flow areas.
